

# KICKSTART YOUR GAME

## LIGHT OIL

Designed for light oil conditions, the Thrill™ provides length and control when the lanes are dry and friction is high. The Thrill™ is available at an incredibly attractive price point, but it's not just a great option for bowlers buying their first ball. We've been very intentional about designing a piece that higher rev competitive bowlers will appreciate because it pushes further down the lane before making a move on dry lanes.

## AGILITY™ XP REACTIVE

The new Agility™ XP (Striking Precision) Reactive cover stock on the Thrill complements the performance attributes of the Flux™ weight block making it ideal for dry lanes.

## FLUX™ WEIGHT BLOCK

The new Flux™ weight block pairs a higher RG with a very low differential to create length through the front of the lane and provide ball motion control on the backend of the lane.

15# RG: 2.57

15# Diff: .015

Flare: 2"+

## 5500 GRIT LSP FINISH

The 5500 Grit LSP finish provides length through the front of the lane to delay response on high friction surfaces.
