

WARNING: HIGHLY REACTIVE **NUCLEAR FORGE™**

MEDIUM-HEAVY OIL

WARNING, this new Nuclear Forge is highly reactive! Witness the revolution of bowling dominance as the fiery glow of the Nuclear Forge takes over the lanes. Creating a fusion of the proven Detonator core with new Propulsion HVP coverstock, the Nuclear Forge provides length through the front of the lane with electrifying backend motion. Brace yourself for the arrival of a ball so explosive, it redefines what's possible.

DETONATOR™ WEIGHT BLOCK

The Detonator core pulses with energy inside the Nuclear Forge. This highly stable core fuses a fast-spinning, low RG design with high differential strength.

15# RG: 2.47 | 15# Diff: .055 | Flare: 5"+

PROPULSION™ HVP PEARL REACTIVE

Following the success of the Propulsion coverstock on the PBA Tour, MOTIV R&D set out to create a Propulsion cover that could handle higher concentrations of oil. The new Propulsion HVP cover on the Nuclear Forge is that cover. This Propulsion High Volume Pearl cover has more traction in oil than Propulsion DRS, but with the same technology at its base. This dynamic pearl coverstock is the pinnacle of MOTIV's expertise!

5000 GRIT LSS FINISH

A 5000 grit LSS finish adds length through the front of the lanes while still proving plenty of traction for a strong motion on the backend.
